NINJA 1100SX ZX1100HSFNN-GY1

FEATURES

Smartphone Connectivity

A Bluetooth chip built into the instrument panel enables riders to connect to their motorcycle wirelessly. Using the smartphone application "RIDEOLOGY THE APP," a number of instrument functions can be accessed, contributing to an enhanced motorcycling experience.

Excellent Wind Protection

Wind protection afforded by the full-fairing bodywork is complemented by a new windshield with four available positions. As before, the windshield is adjustable by hand (without tools).

KQS (Kawasaki Quick Shifter)

Complementing the Ninja 1000SX's exhilarating engine character, the quick shifter enables clutchless upshifts and downshifts for seamless acceleration and quick and easy deceleration.

Electronic Cruise Control

Kawasaki's cruise control system allows a desired speed to be maintained with the simple press of a button. Once activated, the rider does not have to constantly apply the throttle. This reduces stress on the right hand when traveling long distances, enabling relaxed cruising and contributing to a high level of riding comfort.
